

How to cut a paper snowflake in 6 easy steps

- 1) Start with a square piece of paper folded in half making a triangle.
 - a. If you have an $8\frac{1}{2} \times 11$ piece of paper, fold a triangle and cut off the remaining paper at the bottom.
- 2) Fold this triangle in half.
- 3) Then fold it into thirds.
- 4) Cut off the dangling points at the bottom.
- 5) Cut all around the edges...any way that you would like, unfold, and...
- 6) Voila! A Snowflake.

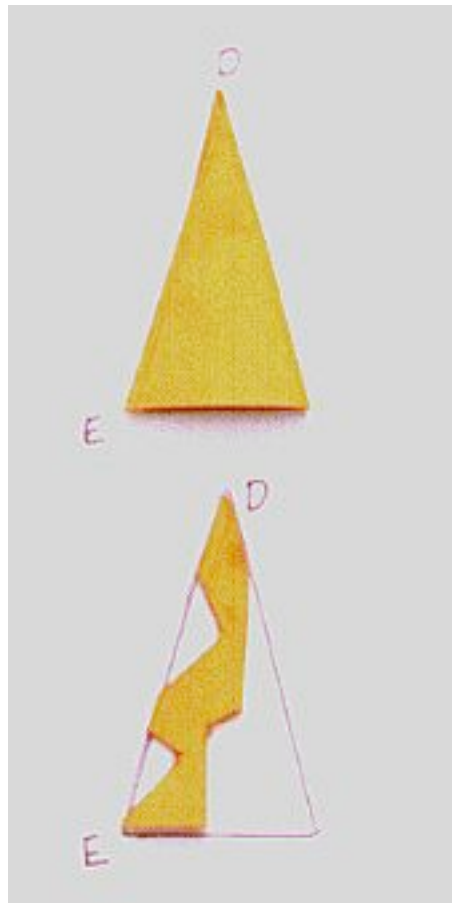

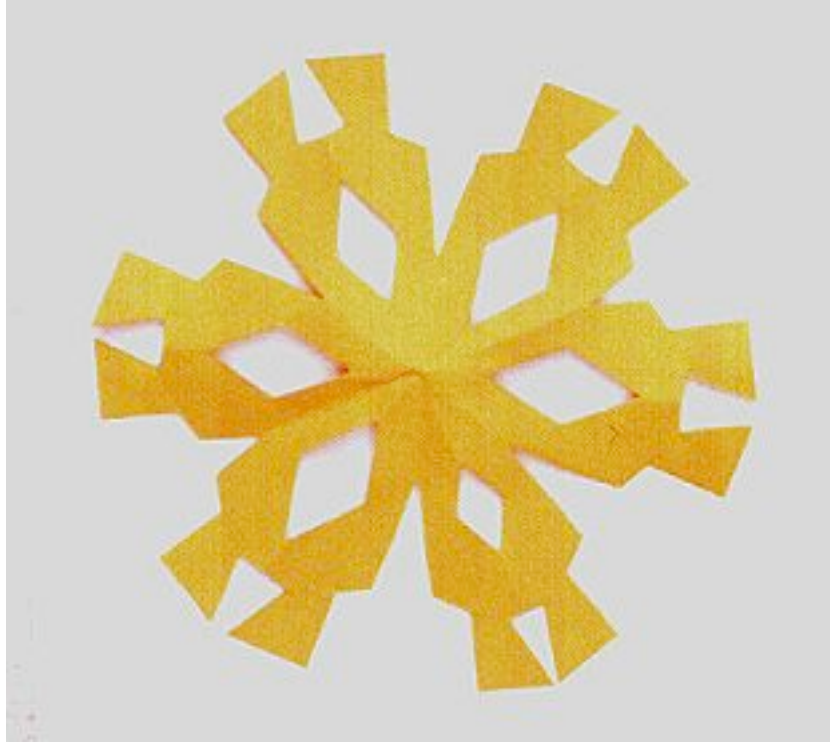

Step 3 (cont.)

Step 4

Step 5

This is just a sample. You can cut any pattern you'd like. It will always turn out beautiful.
